

As you all know, the New Moon Pub Company has never been shy of a great deal, but this one is a 'corker' even for us.

Our wines represent possibly the most value for money, you can find on a wine list. We are a business and therefore we do need to make a profit, now & then. Most restaurants will bang a percentage margin on their wines - result? - the better, top end wines end up so expensive that they run the risk of being out of reach to most wine lovers. Not us though - a nice bottle of Chablis costing a restaurant £15 could conceivably be listed at £52 based on a 70% profit margin. Our Chablis is £28.50, as we use a cash margin approach and take a similar amount (around £10.50) on all our bottles.

So, basically, throw a few more quid into the wine budget & you will be rewarded with some of the best value drinking seen in the area. Well, here goes..... Happy & Prosperous Drinking!!
